

SESSION 1 TASK 4

(For those who may wish to finish this task before moving on to Task 5)

Task: Mapping Course Topics to Responsibility Areas

TASK 4 INSTRUCTIONS

---

Mapping the course topics from the National CyberWatch Center Outcomes-Based Curriculum Library, CSEC Curriculum Guidelines, Certification Exams, and other sources to the Responsibility Areas identified as defining capability maturity of cybersecurity personnel.

TASK STEPS:

1. A single Course Topic will be listed ONE AT A TIME in a ruled index card on the left side of the screen.

2. Check any box next to a Responsibility Area listed on the right side of the screen.

NOTE: This should be an intuitive choice -- don't deliberate too long. You should decide on each mapping in no more than 15 seconds with an average of 3-5 seconds each. We are interested in your "gut reaction" on categorization.

3. The card will disappear and a new card will be presented and the total remaining will decrease by one.

4. Repeat steps 1-3 until the screen indicates all course topics have been mapped.
